

## KINGFISHER WINGS

Freight & Logistics Operating Platform

# Customs Clearance

## End-to-End Service Workflow

Standalone clearance service · Not tied to sea or air freight

Job ownership: Sales → Operations / CHA → Accounts → Sales (close)

1. Sales

2. Operations

3. Accounts

4. Sales close

# 1. What Customs Clearance Means for KingFisher

**Service framing:** Customs clearance is a standalone service — not a freight mode. Freight (sea / air / land) may move cargo to the border, but clearance is the advocacy and filing work with Customs: documents, HS classification, duty, examination, and release. Think of it as a lawyer for cargo that is held by Customs.

## Department handoff (locked for this process)

The job **starts in Sales** (enquiry and quotation). After the customer accepts, it **moves to Operations / CHA** for documentation, filing, and customs handling. When duty is assessed, it **moves to Accounts** for payment and financial confirmation. After cargo is released, **Sales closes the job** with final invoicing and archive.

## 2. How FRESA Handles Clearance (reference)

In the FRESA Gold Sea Freight manual, clearance is embedded inside shipments rather than sold as its own product module. KingFisher treats clearance as a sellable standalone service, while reusing the same practical building blocks FRESA already shows on shipments.

| FRESA feature                | Where it appears                        | KingFisher takeaway                                    |
|------------------------------|-----------------------------------------|--------------------------------------------------------|
| CHA / Clearance parties      | Organization tab on LCL / FCL shipments | Assign a customs broker / CHA on every clearance job   |
| HS Code on cargo lines       | Consignment and dimension lines         | Line-level HS, country of origin, and goods value      |
| Shipping Bill tab            | Export shipment tabs                    | Export clearance produces a Shipping Bill              |
| Customs tab                  | Import and export shipment tabs         | Import clearance produces Bill of Entry / entry number |
| Custom seal                  | Import container details                | Optional when containers are linked                    |
| Charges and purchase invoice | Costing on the same shipment            | Agency fee plus duty paid on behalf (disbursements)    |

### 3. Current Capability vs Target Service

#### Already available in KingFisher

- Customs Clearance job type and module permission (label ready).
- HS Code master with duty rates, dangerous-goods flags, prohibited / restricted marks.
- Customs broker party type, customs charge group, and customs tax type.
- Import jobs already track entry number, duty / tax amounts, clearance date, and status (Pending → Filed → Query → Cleared → Released).
- Deposits, customs examinations (air import), Bill of Entry records, and EDI / MPCl gateways.

#### Still needed for a true CHA desk

- Full clearance job detail (direction Import / Export / Transit), declaration lines, and milestones.
- Document checklist, customs query log, and optional link to a freight job when KingFisher also moves the cargo.
- Duty calculation from HS rates (today duty is entered manually).
- Shipping Bill / IGM–MRN workspace and wider examination support beyond air import.

### 4. Recommended Operating Model

**Recommended:** Always create a standalone Customs Clearance job. Optionally link it to a KingFisher sea / air / land job when we also move the cargo. Walk-in and third-party freight must work without a freight booking in our system. Reuse charges, invoices, deposits, examinations, HS master, and existing Bill of Entry / EDI tools.

| Building block       | Purpose                                                                                                                                                                  |
|----------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Clearance job header | Direction (Import / Export / Transit), customs office, broker, entry type and number, filing and assessment dates, duty totals, optional freight link, release reference |
| Clearance lines      | Commodity, HS code, origin, packages, weight, customs value, duty snapshot and amount, restricted flags                                                                  |
| Document checklist   | Commercial invoice, packing list, BL / AWB, certificate of origin, permits, insurance, power of attorney                                                                 |
| Customs query log    | Authority question, due date, reply, attachments                                                                                                                         |
| Money and evidence   | Agency fee, disbursements, deposits / bonds, examination results, customer invoice                                                                                       |

## 5. Use Cases by Department

| ID    | Owner               | Use case                                                                  | Successful outcome                                   |
|-------|---------------------|---------------------------------------------------------------------------|------------------------------------------------------|
| UC-01 | Sales               | Quote clearance-only service (agency fee + estimated disbursements)       | Customer-approved clearance quotation                |
| UC-02 | Operations / CHA    | Open clearance job from quote or walk-in; set Import / Export / Transit   | Job opened with checklist and empty lines            |
| UC-03 | Customer            | Upload commercial invoice, packing list, BL / AWB, permits                | All required documents marked received               |
| UC-04 | Operations / CHA    | Classify each line to HS; block prohibited; gate restricted with permit   | Lines classified and ready to file                   |
| UC-05 | Operations / CHA    | File Bill of Entry (import) or Shipping Bill (export); store entry number | Status Filed                                         |
| UC-06 | Operations          | Answer customs query / amend declaration                                  | Query closed; filing updated with audit trail        |
| UC-07 | Accounts / Customer | Pay assessed duty and tax (self-pay or paid on behalf)                    | Status Duty Paid; disbursement recorded if on behalf |
| UC-08 | Operations          | Record physical examination result                                        | Pass continues; fail returns to query / hold         |
| UC-09 | Operations          | Mark cleared and arrange release / delivery order                         | Cleared → Released; customer notified                |
| UC-10 | Sales               | Final invoice for agency + disbursements; close and archive job           | Invoice issued; job Closed                           |
| UC-11 | Operations          | Optionally link or unlink a freight job                                   | Handoff without duplicating cargo master data        |
| UC-12 | Tenant Admin        | Maintain HS Code master (rates, DG, prohibit / restrict)                  | Classification stays accurate                        |

## 6. Document Checklist (Minimum)

|                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                    |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Import clearance</b> <ul style="list-style-type: none"> <li>• Commercial Invoice + Packing List</li> <li>• BL / AWB / truck waybill</li> <li>• Certificate of origin (if preferential)</li> <li>• Permits / licenses for restricted HS</li> <li>• Insurance / valuation support if queried</li> <li>• Power of Attorney / CHA authorization</li> </ul> | <b>Export clearance</b> <ul style="list-style-type: none"> <li>• Commercial Invoice + Packing List</li> <li>• Booking / shipping instruction</li> <li>• Export license if controlled</li> <li>• Shipping Bill draft data + HS lines</li> <li>• Drawback / bond documents if applicable</li> <li>• Power of Attorney / CHA authorization</li> </ul> |

## 7. End-to-End Workflow Diagrams

The following visuals show the full process with department ownership. Colour key: **Sales (start)** · **Operations / CHA** · **Accounts** · **Sales (close)** · **Customs (external)**.

### FULL PICTURE — Flowchart · Activity · Status

Figure A — Complete customs clearance infographic with department ownership

**5 · FLOWCHART — Job starts in Sales, ends in Sales**

Phase handoff: **Job Starts (Sales)** → **Operational Process (Operations / CHA)** → **Financial Process (Accounts)** → **Job Closure (Sales)**.

**5. Flowchart, End-to-end Customs Clearance**

Department ownership: Sales → Operations/CHA → Accounts/Finance → Sales closes job

Figure B — End-to-end flowchart by phase and department

## 6 · ACTIVITY — Who does what across departments

The same clearance job moves across Sales → Operations → Accounts → Sales. Customer and Customs appear as external parties in the activity view.

### 6. Activity Diagram, Department Responsibilities

The same CC job moves across Sales → Operations → Accounts → Sales

Figure C — Activity diagram with department responsibilities

7 · STATUS MACHINE — Ownership changes with lifecycle

Recommended job statuses and which department owns each stage. Sales owns intake and final close; Operations owns filing and release; Accounts owns duty payment.

7. Status / Activity State Machine

Ownership changes with the job lifecycle, Sales → Operations → Accounts → Sales

Figure D — Status / activity state machine with department ownership

Status ownership summary

| Status                          | Owner      | Meaning                                  |
|---------------------------------|------------|------------------------------------------|
| Pending / Quoted / Accepted     | Sales      | Enquiry and commercial acceptance        |
| Ops Open / Docs / Classified    | Operations | Job opened; documents and HS ready       |
| Filed / Query / Assessed        | Operations | Declaration lodged; customs dialogue     |
| Duty Paid                       | Accounts   | Duty and tax settled (self or on behalf) |
| Under Exam / Cleared / Released | Operations | Exam (if any), clearance, gate-out       |
| Invoiced / Closed               | Sales      | Final billing and archive                |

## 8. Suggested Delivery Phases

| Phase   | What we deliver                                                         | Why it matters                                  |
|---------|-------------------------------------------------------------------------|-------------------------------------------------|
| Phase 0 | Clearance job workspace: header, lines, checklist, statuses, milestones | Makes Customs Clearance a real operable service |
| Phase 1 | HS master validation; hard stop on prohibited; permits for restricted   | Protects compliance at classification time      |
| Phase 2 | Query handling, duty payment / disbursements, Sales closing invoice     | Completes money path and Sales job closure      |
| Phase 3 | Optional freight-job link and customer portal document upload           | Supports walk-in and freight handoff            |
| Phase 4 | Extend Bill of Entry / EDI tools; Shipping Bill and local filings       | Country-specific customs connectivity last      |

## 9. Decision to Confirm with Client

**Decision:** Keep Customs Clearance as its own job (recommended), not only a status on a freight shipment. Dual mode: standalone always; optional link when KingFisher also moves the cargo.

**Ownership rule:** Sales starts → Operations runs → Accounts pays → Sales closes.
