

KINGFISHER

Customs Clearance End-to-End Workflow

Standalone service · Sales → Operations / CHA → Accounts → Sales closes

Process document for client review

Based on FRESA Gold sea-freight practices and KingFisher operations design

How the job moves across departments

Every Customs Clearance job **starts in Sales** (enquiry, quote, customer acceptance). It then **moves to Operations / CHA** for documents, HS classification, filing, examination, clearance and release. It then **moves to Accounts / Finance** for duty payment and disbursement control. Finally it **returns to Sales** to invoice the customer and **close / archive** the job.

Customs clearance is treated as its own service — like a lawyer for cargo held by Customs — not as a side-step of sea freight or air freight. Freight may bring the cargo to the border; the clearance job owns documents, classification, duty, examination and release.

1. Department ownership of the CC job

The same Customs Clearance job is handed across four ownership stages. Nothing below is a separate freight mode — it is one clearance service file.

Department	Role	Responsibilities
Sales	Starts the job	Receive clearance enquiry, prepare Customs Clearance quotation, obtain customer acceptance. Later: final invoice and close / archive the job.
Operations / CHA	Runs the customs work	Open the Customs Clearance job, collect and verify documents, classify HS codes and value, compliance check, file Bill of Entry or Shipping Bill, handle customs queries, coordinate examination, obtain clearance, arrange cargo release.
Accounts / Finance	Handles money	Receive duty / tax payment request, pay customs (or record client payment), record disbursements, confirm financial completion.
Sales (closure)	Closes the job	Prepare / finalize CC invoice to customer, billing follow-up, mark job completed and archive.

Ownership stages at a glance

JOB STARTS — Sales

- 1) Clearance enquiry
- 2) Prepare CC quotation
- 3) Customer accepts

OPERATIONAL PROCESS — Operations / CHA

4–14) Create job, documents, HS & value, compliance, file BOE/SB, assessment, queries, exam, clearance, cargo release

FINANCIAL PROCESS — Accounts / Finance

15–18) Duty payment request, pay or record client payment, disbursements, financial confirmation

JOB CLOSURE — Sales

19–21) Finalize CC invoice, billing follow-up, close / archive job

2. End-to-end visual overview

Colour legend used in the overview: **Sales (start)** · **Operations / CHA** · **Accounts / Finance** · **Sales (closure)** · **Customs (external)**.

Figure 1 — Customs Clearance end-to-end workflow with department ownership.

3. Flowchart — end-to-end Customs Clearance

Department sequence: Sales → Operations / CHA → Accounts / Finance → Sales closes the job.

5. Flowchart, End-to-end Customs Clearance

Department ownership: Sales → Operations/CHA → Accounts/Finance → Sales closes job

Figure 2 — Process flowchart grouped by department stage.

4. Activity diagram — who does what

The same CC job moves across Sales, then Operations, then Accounts, then back to Sales for closure. Customer actions (request, approve, upload documents) sit alongside internal departments.

6. Activity Diagram, Department Responsibilities

The same CC job moves across Sales → Operations → Accounts → Sales

Figure 3 — Activity diagram showing department responsibilities.

5. Status / activity state machine

Ownership changes with the job lifecycle: **Sales** → **Operations** → **Accounts** → **Sales**. Statuses below are the recommended clearance lifecycle for a standalone Customs Clearance job.

7. Status / Activity State Machine

Ownership changes with the job lifecycle, Sales → Operations → Accounts → Sales

Figure 4 — Status state machine with department ownership on each status.

Status	Owner department	Meaning
PENDING	Sales	Intake of clearance enquiry
QUOTED	Sales	CC quotation issued
ACCEPTED	Sales	Customer accepted quote — handoff to Ops
OPS_OPEN	Operations / CHA	Customs Clearance job opened
DOCS	Operations / CHA	Document checklist in progress
CLASSIFIED	Operations / CHA	HS codes and values ready
FILED	Operations / CHA	BOE / Shipping Bill lodged
ASSESSED	Operations / CHA	Duty / tax known (queries handled)
DUTY_PAID	Accounts / Finance	Duty paid or client payment recorded
CLEARED	Operations / CHA	Customs clearance obtained
RELEASED	Operations / CHA	Cargo release arranged
INVOICED / CLOSED	Sales	Customer invoiced; job closed & archived

Loops that stay with Operations

If Customs raises a **QUERY**, Operations replies or amends and returns to **FILED**. If examination finds issues, Operations may move back to query / amendment before clearance.

6. What Customs Clearance means in KingFisher

Clearance is advocacy and filing for cargo under Customs control. It is sold and run as its own service. It may run alone (walk-in / third-party freight) or be optionally linked when KingFisher also moves the cargo by sea, air or land.

Recommended operating model

- One Customs Clearance job per case, with direction Import, Export or Transit.
- Optional link to a freight job when KingFisher also handles the transport.
- Reuse of charges, invoices, deposits, examinations and HS code master data.
- Never require a freight booking — third-party BL / AWB clearance must work.

How FRESA handles clearance (reference)

In the FRESA Gold Sea Freight manual, clearance is embedded inside shipments — not a separate product chapter. KingFisher adopts the useful parts but keeps clearance as a standalone service line.

FRESA feature	Where it appears	Implication for KingFisher
CHA / Clearance parties	Organization tab on shipments	Assign Customs Broker / CHA on the CC job
HS Code on cargo lines	Consignment & dimensions	Line-level HS, country of origin, goods value
Shipping Bill tab	Export shipments	Export clearance uses Shipping Bill
Customs tab	Import & export shipments	Import clearance uses Bill of Entry / entry number
Custom seal	Import containers	Optional when linked to containers
Charges & purchase invoice	Costing on same shipment	Customs charges + duty paid on behalf (disbursements)

7. Business use cases

ID	Actor	Use case	Success
UC-01	Sales	Quote clearance-only service (agency fee + estimated disbursements)	Approved CC quotation
UC-02	Operations / CHA	Open CC job from quote or walk-in (Import / Export / Transit)	Job opened with checklist
UC-03	Customer	Upload commercial invoice, packing list, BL/AWB, permits	Required documents received
UC-04	Operations / CHA	Classify each line to HS; block prohibited; gate restricted	Lines classified
UC-05	Operations / CHA	File Bill of Entry (import) or Shipping Bill (export)	Entry filed
UC-06	Operations	Respond to customs query / amend declaration	Query closed; re-filed
UC-07	Accounts / Customer	Pay assessed duty / tax (self or paid on behalf)	Duty paid recorded
UC-08	Operations	Record physical examination result	Pass → continue; Fail → query / hold
UC-09	Operations	Mark cleared and arrange release / gate-out	Cleared → Released
UC-10	Sales / Accounts	Invoice agency fee + local CC charges; close job	Invoice issued; job closed
UC-11	Operations	Optionally link / unlink a freight job	Handoff without duplicating cargo
UC-12	Tenant Admin	Maintain HS code master (rates, restrictions)	Classification stays accurate

8. Document checklist (minimum)

Import clearance • Commercial Invoice + Packing List • Bill of Lading / AWB / truck waybill • Certificate of Origin (if preferential) • Permits / licenses for restricted HS • Insurance / valuation support if queried • Power of Attorney / CHA authorization	Export clearance • Commercial Invoice + Packing List • Booking / shipping instruction • Export license if controlled • Shipping Bill draft data + HS lines • Drawback / bond documents if applicable • Power of Attorney / CHA authorization
---	--

9. Delivery roadmap (business view)

Phase	What we deliver	Focus
Phase 0	Make Customs Clearance a real job type with detail, lines, checklist and milestones	Foundation
Phase 1	Enforce HS master rules (prohibit / restrict / permits)	Compliance
Phase 2	Queries, duty payment, disbursements and invoicing path	Money
Phase 3	Optional link to freight jobs + customer document upload	Handoff
Phase 4	Bill of Entry / Shipping Bill workspace and local customs filings	Localisation

Decision to lock with the client

Keep Customs Clearance as its **own job** (recommended), not only a status on a freight job. Dual mode: always available standalone; optionally linked when KingFisher also moves the cargo.
