Beyond Fresa

KingFisher Wings / FreightSaas capabilities that go past classic Fresa Gold: negotiation, rich customer & vendor portals, finance self-serve, custom statuses, booking forms, acknowledgements, and ops continuum.

Product & engineering brief | 20 October 2026

How to read this document

BEYOND FRESA = differentiators or deep extensions. FRESA-ALIGNED = familiar Fresa-style workflows strengthened here (path hints, dual portals, typed docs, etc.).

Contents

1. Headline differentiators (the big ones)
2. Customer Portal - full capability map
3. Admin / Staff ERP - extras beyond Fresa
4. Vendor Portal - extras beyond Fresa
5. Cross-portal matrix
6. Demo talking points

1. Headline differentiators

These capabilities most clearly separate KingFisher Wings from a classic Fresa-style staff ERP with a thin customer view.

01 COMM

Quote negotiation & counter-offers

Customer can accept, reject, or counter-offer. Staff negotiate with revise-and-send, accept/reject counter, and a full negotiation timeline. Same pattern mirrored for vendor cost offers.

02 CUSTOMER PORTAL

Messages & invoice disputes

Party-shared message threads with attachments and staff inbox/replies. Structured invoice disputes with review/resolve on the staff side - not just email.

03 FINANCE SELF-SERVE

Invoices, payment proofs & online pay

Portal invoices with PDF, attachments, remittance/payment-proof upload, Stripe checkout and payment status. Credit summary, open items, and statement-style exports.

04 DELIVERY PROOF

Formal delivery acknowledgement

Customer submits goods-receipt acknowledgement with signature upload - closes the last-mile loop without WhatsApp chasing.

05 STATUS FLEXIBILITY

Custom status catalog buttons

Tenant-defined status labels/catalogs for quotations, shipments, and jobs - add custom status options without hard-coding every label in the UI.

06 BOOKING WITHOUT PREMATURE JOBS

Quotation-scoped booking forms

Customer fills and submits booking forms (all modes + docs) on the quotation. Admin sees the form only after submit; job is created only on Generate Job.

07 VISIBILITY

Track-by-anything + public track

Lookup by job, shipment, container, BL/AWB, barcode, token. Portal milestones + public track without login. Typed document visibility (staff / customer / vendor).

08 VENDOR DEPTH

Full vendor portal (not pay-only)

Vendor auth, job offers, cost negotiation, documents, costing (cost-only), finance, payouts, payment proofs, and ops continuum attachments - a true second portal.

2. Customer Portal - capability map

The customer portal is a first-class product surface: auth isolated from staff ERP, party ownership filters, and self-serve commercial + ops + finance workflows.

2.1 Access, identity & preferences

Capability	What it does	Tag
Portal login / invite / refresh	Dedicated portal auth; accept invite; change password; session refresh	BEYOND
Party portal users & permissions	Staff invite/disable portal users; permission packs per party	BEYOND
Dashboard & preferences	Portal home stats; saved UI/filter preferences	BEYOND
In-app notifications	Unread counts, mark read, event-driven alerts	BEYOND
Unit converters	Length / CBM / weight / liquid / volume helpers	BEYOND

2.2 Quotations & booking (commercial)

Capability	What it does	Tag
Quote list, detail, PDF	Customer-safe quotation views and PDF download	ALIGNED
Online quote / estimate / costing	Service catalog, estimate, costing options, request quote	BEYOND
Accept / reject / counter-offer	Full negotiation loop with timeline; staff revise-and-send	BEYOND
Booking form (quote & shipment)	Draft, upload mandatory docs, complete/submit - all modes + air	BEYOND
Convert / Generate Job gate	No auto job on form open; admin Generate Job is the cutover	BEYOND

2.3 Shipments, track & acknowledgement

Capability	What it does	Tag
Shipments list / detail / CSV	Owned shipments, summary, export for Excel users	BEYOND
Lookup & tracking	Ref lookup (container, BL, AWB, job); milestones + history	BEYOND
Document requests	Request draft BL / HAWB / DO; container confirm-pick; port token	BEYOND
Delivery acknowledgement + signature	Formal POD-style acknowledgement with signature image	BEYOND
Typed job documents	List / download / upload with customer visibility ACL	BEYOND
Ops continuum attachments	See staff-shared continuum files; upload for staff	BEYOND

2.4 Finance, CCP, messages & disputes

Capability	What it does	Tag
Invoices & open items	List, detail, PDF, summary, CSV export, attachments	BEYOND
Payment proofs / remittance	Upload proof against invoice; staff matching	BEYOND
Online payments (Stripe)	Checkout, pay, status, retry / cancel sessions	BEYOND
Credit portal (CCP)	Credit summary / limits; credit-increase requests	BEYOND

Capability	What it does	Tag
Messages (party-shared)	Threads with replies & attachments; staff inbox	BEYOND
Invoice disputes	Raise dispute with attachment; staff review / resolve	BEYOND
Customs clearance (portal CC)	Customer CC jobs, checklist, document upload	BEYOND
Portal tasks	Customer-facing task list for pending actions	BEYOND

3. Admin / Staff ERP - extras beyond Fresa

Staff retain Fresa-style job/shipment/quote shells (detail tabs, path hints, costing, org, routing). Below are the meaningful additions or deepenings.

3.1 Commercial & booking

BEYOND FRESA	Negotiation desk - timeline, accept/reject customer counter, revise-and-send.
BEYOND FRESA	Booking form gate - admin sees submitted customer form only; Generate Job materializes form onto the job.
BEYOND FRESA	Mode booking forms - Sea FCL/LCL, land, road, courier, customs, warehouse, air compliance + mandatory docs.
BEYOND FRESA	Verify -> Approve -> Generate Shipment / Job - explicit gates; no silent provisional job from form open.
BEYOND FRESA	Pass-to-vendor / job offers from quotation or job into vendor negotiation.
FRESA-ALIGNED	Quotation/shipment/job detail tabs with path_hints and action flags for FE.

3.2 Status catalogs & workflow polish

BEYOND FRESA	Custom status catalog APIs for quotations, shipments, jobs - create/update/deactivate label options.
BEYOND FRESA	Status-options endpoints power UI custom status buttons.
BEYOND FRESA	Staff change-status with catalog codes mapped to system statuses.
BEYOND FRESA	Staff portal inbox for messages & dispute management (CCP staff APIs).

3.3 Ops, track, docs & continuum

BEYOND FRESA	Public / staff Track & Trace - track-by-anything; unified milestone history.
BEYOND FRESA	Typed document uploads with visibility to customer/vendor; booking-form document kinds.
BEYOND FRESA	Ops continuum comments & attachments across quotation / shipment / job.
BEYOND FRESA	Delivery acknowledgement admin view of customer POD/receipt.
BEYOND FRESA	Exception / KPI / job-not-invoiced-DO / job-finance-by-shipment-date report packs.
BEYOND FRESA	Closed-job permission-aware overrides; SABER / RA / ISF refs; overseas agent role.
BEYOND FRESA	Favourites, staff activity emails, cross-module notifications.

3.4 Masters & platform

BEYOND FRESA	Multi-tenant hierarchy: SuperAdmin -> Company -> Tenant -> Tenant Admin -> staff roles.
BEYOND FRESA	Portal/vendor user administration from party masters; permission packs.
FRESA-ALIGNED	Deep masters (ports, charges, tariffs, zip distances, freight specs) feeding quotes and jobs.

4. Vendor Portal - extras beyond Fresa

Classic Fresa is staff-centric. KingFisher ships a dedicated vendor portal with commercial negotiation and finance - not only a payout screen.

		Capability
Vendor auth & users	Isolated vendor login; party vendor users & permissions	BEYOND
Dashboard & lookups	Vendor home; converters; reference lookups	BEYOND
Job offers / quotes	List offers; cargo-safe detail; negotiation timeline	BEYOND
Accept / reject / counter-offer	Cost-side negotiation; accept can auto-generate purchase invoice	BEYOND
Jobs & costing	Vendor job views; cost-only costing (no customer revenue)	BEYOND
Typed documents	Upload/list/download with vendor visibility ACL	BEYOND
Finance & payment proofs	Purchase invoices, attachments, payment proofs, email proof	BEYOND
Payouts	Vendor payout portal flows	BEYOND
Ops continuum	Vendor-side continuum attachments for shared entities	BEYOND

5. Cross-portal matrix

Theme	Customer Portal	Admin / Staff	Vendor Portal
Negotiation	Accept / reject / counter	Revise, accept/reject counter, timeline	Accept / reject / counter (cost)
Booking form	Fill + submit + docs	View after submit; Generate Job	-
Messages	Threads + attachments	Staff inbox + reply	-
Disputes	Raise invoice dispute	Review / resolve	-
Invoices	View, PDF, pay, proofs	Full AR	Purchase invoices + proofs
Acknowledgement	Submit + signature	See status	-
Custom statuses	Sees resolved labels	Catalog CRUD + buttons	-
Track & docs	Lookup, milestones, typed docs	Full track + ACL docs	Typed docs on jobs
Ops continuum	Shared attachments	Full continuum	Shared attachments
Online payments	Stripe checkout	Reconciliation	Payouts / proofs

6. Demo talking points

1. "Negotiate in-product." Customer counters a quote; staff revises; vendor counters a cost offer - one commercial language on both sides.
2. "Portal is not a track-only site." Messages, disputes, invoices, payment proofs, Stripe, credit requests, booking forms, acknowledgement.
3. "No fake jobs." Opening a booking form does not invent a job; admin Generate Job is the cutover; form appears for staff after customer submit.

4. "Statuses you own." Custom status catalog buttons for quotes/shipments/jobs - tenant vocabulary, not only hard-coded enums.
5. "Three audiences, one ops spine." Staff ERP + customer portal + vendor portal share track, typed docs, and continuum with the right ACLs.
6. "Beat-Fresa ops packs." Exceptions, DO-not-invoiced, shipment-date finance, closed overrides, overseas agent / compliance refs.

Source of truth: src/modules/portal, vendor, quotations, jobs, ops-activity, track, invoices. Classic Fresa parity docs: docs/fresa-parity/. This PDF highlights extensions, not 1:1 Fresa coverage. Also available as HTML: docs/Beyond-Fresa-Feature-Differentiation.html
